DIRECTION

A quieter system.
A stronger body of work.

A white editorial portfolio, with product craft in the foreground.

Make Bruce’s judgment visible through clear choices, working products and deliberate visual restraint. This guide governs new pages, features, covers and interactions.

Coming soon

Coming soon

Wide covers. Four projects. Two honest spaces for what comes next.

Show the work. Say only what the visual cannot.

A requirement for every future section, not a finishing pass.

REFERENCE HIERARCHY

One visual language.

Studio Maria leads. Other references inform specific parts of the experience.

01

Studio Maria / primary

A continuous white canvas, restrained navigation, disciplined sans-serif type and imagery that carries the page. Keep our identity and compact gallery; do not copy its assets.

02

Harbor Bai / proportion + brevity

Use wide landscape covers and short explanations between substantial visuals. Synapse, Dive-in LLM and O2 establish a concise case-study rhythm. Keep our names inside covers.

03

Apple / product demonstration

Apply clear hierarchy and readable device demos inside case studies. Product media can be large; the surrounding UI remains quiet and neutral.

04

DMCG, Qantas and Artem / craft + narrative

Use restrained object depth, show the product early, and connect decisions to evidence. These references inform the story, not a new palette or type system.

Do not alternate between reference styles section by section. The glass B·XYZ is the site’s signature artwork, not a treatment for every interface surface.

FOUNDATIONS

White. Graphite. Space.

Canvas	Inset	Ink	Supporting	Edge
#FFFFFF	#F7F7F7	#171717	#666666	#E8E8E8

Alternate white with #F3F3F3 on selected covers. No beige or blue tint. Keep authentic color in product media and the existing glass artwork. No red band or dark footer. Navigation contains About, Contact and language switching.

Inter, throughout.

ROLE	DESKTOP	NARROW
Home headline	44–60 px	38–52 px
Home introduction	21–26 px	20–21 px
Project title	20–26 px	22 px
New body copy	16–18 px	16 px
Navigation / labels	14–15 px	14–15 px
Metadata only	12–13 px	12–13 px

Use weight 400 for UI, 500–600 for emphasis. Tight display tracking, natural body spacing. Cut copy before shrinking it. Small metadata must never carry the main explanation.

COMPONENT CONTRACTS

Keep the frame quiet.

Six landscape tiles. Four real projects. Two pending studies.

Pison Health Agent	Qwen Create	Co-Hive
Product / thematic visual	Product / thematic visual	Product / thematic visual

1.9:1 ratio · 18 px corners · 18 px gap · 26 px title inset

01 ## Same hierarchy for every project

Project titles share one scale and alignment. Keep names inside covers. No caption rows, roles or summaries underneath. Containers remain still.

02 ## Artwork with honest provenance

Use the real Pison Watch image. The phone, creative canvas, optical study and locker study are illustrative cover art. Replace thematic graphics when supplied project media becomes available.

03 ## A smaller signature

B·XYZ uses an inner glyph scale of 0.44, 12% smaller than before. Place X high, Y low, B and Z in the middle band. Mobile uses a compact 260–370 px artwork area; preserve rotation and pointer behavior.

Responsive grid: 3 columns above 809 px, 2 at 621–809 px, 1 at 620 px or below. Gutters: 24 px desktop, 20 px tablet, 16 px phone. Pending tiles have no fake links or hover affordance.

EDITORIAL ECONOMY

Fewer words.
More evidence.

Keep the presentation structure. Remove repetition. Let the product, process and decisions carry the story.

Project premise	15–30 words
Section headline	3–8 words
Section explanation	One sentence, no more than 35 words
Compact card	One idea, 8–18 words
Expanded decision	Choice + tradeoff, no more than 60 words
Case-study narrative	Aim for 250–400 words

Narrative budgets exclude navigation, demo conversations, diagram labels, credits and sources. They are ceilings, not targets. Keep Chinese equally economical without imposing English word counts.

Delete, then redesign.

Remove duplicate intros and captions. Adjust spacing after cutting copy. Never hide overload behind small or pale type. One section should answer one reader question.

Keep the substance.

Preserve decisions, tradeoffs and actual evidence. Use inline disclosures for depth. Label a prototype or proposed integration once, next to the relevant claim.

Pison keeps its demos, contextual conversation, system sequence and business reasoning. Its generated main-content text is reduced from 1,067 to 553 words, including UI labels and expanded details.

HANDOFF + ACCEPTANCE

A rule for the next feature.

Before building, name the reader’s task, the reusable component, and the available evidence. Every new feature must pass the same review.

01 Uses the shared palette, type scale, grid, icons and corner rules.

02 Passes the copy budgets, removes repeated explanations and preserves evidence.

03 Works on desktop and 390 px mobile, in English and Chinese.

04 Supports keyboard access, reduced motion, valid links and readable media.

05 Passes syntax, build and route checks; records browser limits honestly.

06 Updates the guide for system changes and saves previews with source.

Implementation source of truth

docs/DESIGN_SYSTEM.md contains the complete rules. src/design-tokens.css holds shared values. AGENTS.md requires future contributors to read and follow the guide. Current user instructions take precedence.
